

IT911now.com Backup Solution

Proven Data Backup Technology:

- **Single solution for remote and local backups from a single provider**
Can be used to instantly backup and restore data locally and remotely.
- **High-speed fully automated block-level incremental backup engine**
Supporting unlimited versioning, compression, Exchange 2003/2007 & SQL Server, open and locked files, very large files (> 4GB), network mapped drives, and visual/manual editing of arbitrarily complex policies
- **Easy Management, notification, and monitoring features**
Instant email notification of errors/warnings, lack of backup, and unexpected disk usage changes. Web dashboard provides one-screen visualization of status of backup for all accounts from anywhere.
- **Best in class backend infrastructure**
End-to-end data integrity checks (software and hardware), and proactive, automated file-integrity scanning for **absolutely zero data loss**.

Plan B: (Backup Solution) Offers:
